

Beginning February 1, 2007, all CM/ECF filers who pay fees on-line via a credit card will be required to enter the security code field to complete the transaction. Credit card security codes, the 3-4 digits printed on the back of a credit card, are used to verify that the purchaser has the credit card in hand when making a purchase on the Internet. Each brand of credit card uses a slightly different code and may call the code by a different name. The following is a list of the acronyms for the CSC (Card Security Code):

- CVV2 (Credit Card Verification 2)
- CVC (Credit Card Validation Code)
- CID (Card Identification)
- CIN (Card Identification Number)

The security code field has been on the data entry screen, but its use has been optional. On February 1, 2007 it will become a required field as an additional protection of the credit card holders.

Below is a sample of the payment window:

Online Payment - Windows Internet Explorer
